About Us

OM Tech Service LLC - Where Technology Meets Business

Delivering Next-Generation IT Solutions To Delight Smart Users Like You Since 2014

OM Tech is a Software Development Company with headquarters in the U.S. and India. We offer top-notch software products and services to our global clients through a team of 50+ highly skilled tech experts. When a business meets technology and its experts, the most innovative IT Solutions come out that you have ever imagined. We are experienced in both product development, which we have done and are doing with multiple of our own products, as well as in custom software development , throughout which we have recorded dozens of successful collaborations across different products, industries, countries, and customers.

In a nutshell, excellence is in our DNA and creativity is the air we breathe.

We create meaningful, high-quality, and performant software products that inspire. We want to inspire you, your customers, and ourselves every day.

- Enterpise Product Development
- Mobile Application Development
- Web Application Development
- Cloud Solution
- UI/UX Design
- QA And Testing

NACS Standard POS Back office
integration software

We've created a back office solution that is a user-friendly mobile tool, as well as a PC application, that enables CStore managers to manage inventory and pricing effectively. Through the app, managers can quickly look at hourly sale history, providing them with the smart resources they need to make quick decisions about how to best allocate their resources. The result? A more productive and profitable business.

Our app contains multiple models, including: hourly, weekly, and monthly sales history; daily drop counter to avoid error in cash counting; product management system for managing product data; gas inventory and monthly reconciliation of actual sale versus stick reading; order management; instant lottery ticket sale tracking to reduce shortages; and product inventory tracking that tracks variance sale and actual inventory on any given product.

It's an all-in-one CStore management solution that will totally revolutionize how you approach business moving forward.

NACS®
Advancing Convenience & Fuel Retailing

Hourly, Weekly And Monthly Sales **History**
